

The LYNX4 Modular stud welding system offers a full 5/16" welding capacity in the most compact system on the market. The Modular is microprocessor controlled with an improved charging circuit and a high output transformer which maximizes its duty cycle. The system includes enhanced user feedback including safety and fault codes. The Modular is sold as a complete welding system including gun, two ground cables, carrying case, collets and changeover tools.

(The LYNX Modular is made in the USA)

The Raw Facts:

Model: LYNX4 Modular

- Welds #4 - 5/16" (M3 - M8) diameter
- Contact or gap gun available
- Weighs 25 lbs.
- 12" X 12" X 5" (main control unit)
- 81,000uf capacitance
- 50-195 stepless voltage regulation
- 115/230, 50/60Hz (internally switchable, mains voltage)
- Type F, thermally protected transformer. IP-21
- Comes with #8, #10, 1/4" & 5/16" collets

Who is IWT?

International Welding Technologies is a cutting edge manufacturer of capacitor discharge stud welding equipment and fasteners, while also stocking replacement parts to suit all other manufacturers' CD and Arc stud welding equipment. They supply us with mild steel, stainless steel and aluminum fasteners (flanged, DIN, non-flanged) in UNC, UNF and metric sizes for immediate delivery.

Specialty Equipment

Through our partnership with IWT, JHP Fasteners can offer a number of auto-feed and manual load stud welding heads which can be incorporated onto fixed table-top systems, fully automated 2 and 3 axis CNCs, or six axis robots. For the capacitor discharge stud welding industry, IWT produces compact versions of their auto-feed contact and gap stud welding heads as well as bottom load and ram-feed gravity drop weld heads.

IWT also manufactures a drawn arc welding head with integrated shielding gas cup for short cycle welding. Their 14" stand alone vibratory feeder (UVF-14) integrates seamlessly with the LYNX welding power supplies and can be easily adapted to any other stud welding system.

Please contact us with your specific stud welding needs and we will work diligently with IWT to provide a solution that works for you.

Ready?

Whether producing one off fabrications or running high volume production runs the LYNX line of stud welding equipment has a system to fit your needs. We look forward to hearing from you and sharing what this family of stud welders can do for your production levels.
