

The RK-50SP is the workhorse of rivet nut tools from Industrial Rivet and Fastener Company. It comes in a simple to use pull to pressure setup, installing rivet nuts quickly and quietly with conveniently located adjustments. The RK-50SP also features a quick change nose piece design utilizing affordable replacement mandrels and components.

The Raw Facts:

Model # RK-50SP

- Weight - 5.5 Lbs.
- 2-3 second cycle time
- Quick change mandrel design
- Can install M4—M12 & #8—1/2" rivet nuts
- Push to start nose piece to spin on the fastener

Each tool includes either an inch or metric mandrel/nose piece set.

Inch set includes: 8-32, 10-24, 10-32, 1/4-20, 5/16-18 & 3/8-16

Metric set includes: M5, M6, M8 & M10

Industrial Rivet & Fastener Company is the exclusive manufacturer of Rivet King tools.

Did we mention it's affordable?

The RK-50SP is in a class of it's own with a capacity of up to 1/2" or M12 (nuts) with an affordability on par with buying two, less expensive and limited spin-spin tools. Due to its quick change mandrel design utilizing affordable replacement components, you won't have to pay \$50.00 for a mandrel ever again! It also features a unique modular motor assembly enabling the replacement of specific components when needed without replacing the entire housing as is necessary with other outdated tool designs.

The bottom line

The RK-50SP is a versatile tool for a wide array of applications. Whether building a simple fabrication for a point of sale display or a complex assembly, the RK-50SP from Industrial Rivet & Fastener can do the job. If you have an application where you think the RK-50SP would be a good fit, please contact us with the application details and we will walk through that process with you to make sure you're getting the right tool for the right job.

Ready?

Whether producing one off fabrications or running large production runs you should give the RK-50SP a serious look. The RK-50SP is one of the most versatile, user friendly rivet nut tools available today. We look forward to hearing from you and sharing what this tool can do for your production levels.

Access control when you need it

The RK-50SP installs most standard rivet nuts made from aluminum, steel or stainless. The ability to adjust the pressure required for each nut size is easily done by the settings available on the bottom of the tool. This also makes them easily accessible for ANY operator to modify. Knowing that can be a concern in these types of tools, Industrial Rivet & Fastener has made accommodations, allowing you to setup the tool with the proper pressure and then render the adjustments inaccessible to the operator on the production line.
